

RAJ SARKAR

Full Stack Developer | MERN Stack | B.Tech CSE — 3rd Year

+91-8250817204 | rayansingh067@gmail.com | [LinkedIn](#) | [github](#) | [Portfolio](#) | Kolkata, India

PROFESSIONAL SUMMARY

3rd-year B.Tech CSE undergraduate (CGPA: 9.13/10, Brainware University) with production experience as a Junior Full Stack Developer at Krishlabs. Proficient in MERN stack, PostgreSQL, JWT-based authentication, and RBAC. Shipped 4+ full-stack projects including a job portal, finance dashboard, web scraper, and AI document pipeline. Smart India Hackathon 2025 participant. Seeking SDE internships or entry-level full-stack/backend roles.

EXPERIENCE

Junior Full Stack Developer | Krishlabs

March 2026 – Present

- Build and maintain 2 production web applications in the MERN stack serving live users, achieving sub-2s load times through component-level code splitting and lazy loading.
- Designed and implemented RESTful APIs with JWT authentication and RBAC, securing 3+ user-facing endpoint groups and eliminating role-escalation vulnerabilities in production.
- Engineered 15+ reusable React components with Tailwind CSS, reducing UI build time for new features by ~40% through a shared component library.
- Own Git-based version control workflows; conduct code reviews and maintain CI/CD pipelines on Vercel,

PROJECTS

Job Portal Application (Job Pilot)

2026

Tech Stack: *React.js, Tailwind CSS, Supabase (PostgreSQL), JWT, RBAC, Clerk, REST APIs, Vercel*

- Engineered a full-stack job portal with dual-role authentication (recruiter and candidate) using JWT and Clerk, supporting secure session management across 100+ test users with zero auth-related incidents.
- Implemented RBAC with Supabase (PostgreSQL) backend covering the full application lifecycle — job posting, candidate search, and status management — via 12+ REST API endpoints.
- Achieved fully responsive UI with React Router SPA navigation and Tailwind CSS; deployed on Vercel with automated preview deployments on every PR.

NutriScanAI – AI Powered Food Recommendation System

2026

Tech Stack: *React.js, Tailwind CSS, Node.js, Express.js, Supabase, JWT, REST APIs, AI Integration, Vercel, Render*

- Built an AI-powered nutrition platform with personalized food recommendations, AI-based food analysis, restaurant menu scanning, and nutrition tracking based on user preferences and goals.
- Implemented secure JWT authentication, OTP email verification, profile management, and REST API integration for real-time meal and macro tracking.
- Developed a fully responsive React SPA with modern UI/UX, dashboard navigation, and deployed the application on Vercel.

Event Intelligence and Data Aggregation System

2026

Tech Stack: *React.js, Node.js, Express.js, MongoDB (Mongoose), Cheerio, Axios, Vercel/Render*

- Built a full-stack web scraper aggregating event data from 5+ online sources using scheduled cron jobs, reducing manual data collection effort by ~80% and enabling near real-time event discovery.
- Designed a scalable Node.js/Express.js backend with MongoDB and Mongoose ODM, supporting efficient querying across thousands of aggregated event records.
- Implemented error handling and retry logic for scraping jobs, achieving >95% successful data fetch rate across flaky external sources.

Digital Notes Mailing System (AI-Powered)

2025

Tech Stack: *React.js, Node.js, Groq API, Nodemailer*

- Integrated Groq API to convert long-form documents into structured key-point summaries, reducing reading time by up to 70% for end users.
- Automated email delivery of AI-generated summaries via Nodemailer, enabling one-click note sharing with formatted output to any recipient.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), Python, Java, C, C++

Frontend: React.js, HTML5, CSS3, Tailwind CSS
Backend: Node.js, Express.js, Flask, RESTful API Design
Databases: MongoDB, MySQL, Supabase (PostgreSQL)
Auth & Security: JWT Authentication, Role-Based Access Control (RBAC), Clerk
AI / ML: scikit-learn, TensorFlow, Keras, Groq API
Tools & Platforms: Git, GitHub, Postman, VS Code, Vercel, Render
CS Fundamentals: Data Structures & Algorithms, OOP, DBMS, Computer Networks, System Design

EDUCATION

Brainware University, Kolkata B.Tech – Computer Science & Engineering CGPA: 9.13 / 10.0	2023 – 2027
Parulia K. K. High School Higher Secondary — Physics, Chemistry, Biology, Mathematics (PCBM) 82%	2023
Parulia K. K. High School Matriculation (Class 10) 92%	2021

CERTIFICATIONS & TRAINING

MERN Full Stack Development Euphoria GenX Training Program Project-oriented full-stack training covering React.js, Node.js/Express.js, and MongoDB with real-world deployment.	Aug – Oct 2025
AI Track Internship Samsung Innovation Campus Intensive ML/DL training in Python, TensorFlow, and Keras; completed a capstone AI application.	Sep – Nov 2025

HACKATHONS & COMPETITIONS

- Smart India Hackathon 2025 — Built an Automated Compliance Checker for Legal Metrology Declarations on E-Commerce Platforms using web technologies and AI.
- Nexathon Campus Hackathon (Online) — Developed an Organ Donation System prototype under a 48-hour constraint with a cross-functional team.
