

RAJ SARKAR

Full Stack Developer | MERN Stack | B.Tech CSE — 3rd Year

+91-8250817204 | rajsarkar.developer@gmail.com | [LinkedIn](#) | [github](#) | [Portfolio](#) | Kolkata, India

PROFESSIONAL SUMMARY

I'm a 3rd-year B.Tech CSE student at Brainware University (CGPA: 9.13/10) who writes production code — not just side projects. As a Junior Full Stack Developer at Krishlabs, I've built and maintained live applications using the MERN stack, PostgreSQL, JWT authentication, and RBAC. Beyond work, I've independently shipped 4+ full-stack apps including an AI nutrition platform, organ donation system, and a job portal. 100+ LeetCode problems solved. Smart India Hackathon 2025 participant. Open to SDE, Full Stack, or Backend Engineering internships.

EXPERIENCE

Junior Full Stack Developer | Krishlabs

March 2026 – Present

Developed and maintained 2 production web applications using the MERN stack for live users.

- Built RESTful APIs with JWT authentication and role-based access control (RBAC) to ensure secure access.
- Created 15+ reusable React components with Tailwind CSS, speeding up UI development for new features.
- Managed Git-based version control, participated in code reviews, and maintained CI/CD deployments on Vercel.
- Improved application performance through code splitting and lazy loading, helping pages load faster.

PROJECTS

Job Portal Application (Job Pilot)

2026

Tech Stack: *React.js, Tailwind CSS, Supabase (PostgreSQL), JWT, RBAC, Clerk, REST APIs, Vercel*

- Engineered a full-stack job portal with dual-role authentication (recruiter and candidate) using JWT and Clerk
- Implemented RBAC with Supabase (PostgreSQL) backend covering the full application lifecycle — job posting, candidate search, and status management — via 12+ REST API endpoints.

NutriScanAI – AI Powered Food Recommendation System

2026

Tech Stack: *React.js, Node.js, Express.js, Supabase, Redis, JWT, REST APIs, AI Integration, Vercel, Render*

- Built an AI-powered nutrition platform with personalized food recommendations, AI-based food analysis, restaurant menu scanning, and nutrition tracking based on user preferences and goals.
- Implemented secure JWT authentication, OTP email verification, profile management, and REST API integration for real-time meal and macro tracking.
- Developed a fully responsive React SPA with modern UI/UX, dashboard navigation, and deployed the application on Vercel.

Event Intelligence and Data Aggregation System

2026

Tech Stack: *React.js, Node.js, Express.js, MongoDB (Mongoose), Cheerio, Axios, Vercel/Render*

- Built a full-stack web scraper aggregating event data using scheduled cron jobs, reducing manual data collection effort by ~80% and enabling near real-time event discovery.
- Implemented error handling and retry logic for scraping jobs, achieving >95% successful data fetch rate across external sources.

LifeBridge – Organ Donation Management System

2025

Tech Stack: *React.js, Node.js, Express.js, MongoDB, TypeScript, Vercel/Render*

- Developed a full-stack platform connecting donors, recipients, and hospitals with secure JWT-based authentication.
- Built REST APIs and responsive dashboards for organ request management, donor registration, and hospital administration.
- Collaborated in a 5-member team using Git and GitHub for development and version control.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, Python, Java, C, C++
Frontend: React.js, Next.js, HTML5, CSS3, Tailwind CSS
Backend: Node.js, Express.js, FastAPI, REST APIs
Databases: MongoDB, Supabase (PostgreSQL), Redis
Auth & Security: JWT Authentication, Role-Based Access Control (RBAC), Clerk
AI Integration: Groq API
Cloud & DevOps: Docker, AWS, Vercel, Render
Tools & Platforms: Git, GitHub, Postman, VS Code
CS Fundamentals: Data Structures & Algorithms, Object-Oriented Programming (OOP), DBMS, Computer Networks, System Design

EDUCATION

Brainware University, Kolkata 2023 – 2027
B.Tech – Computer Science & Engineering | CGPA: 9.13 / 10.0
Parulia K. K. High School 2023
Higher Secondary — Physics, Chemistry, Biology, Mathematics (PCBM) | 82%

CERTIFICATIONS & TRAINING

MERN Full Stack Development | Euphoria GenX Training Program Aug – Oct 2025
Project-oriented full-stack training covering React.js, Node.js/Express.js, and MongoDB with real-world deployment.
AI Track Internship | Samsung Innovation Campus Sep – Nov 2025
Intensive ML/DL training in Python, completed a capstone AI application.

HACKATHONS & COMPETITIONS

- Smart India Hackathon 2025 — Built an Automated Compliance Checker for Legal Metrology Declarations on E-Commerce Platforms using web technologies and AI.
- Nexathon Campus Hackathon (Online) — Developed an Organ Donation System under a 48-hour constraint with a cross-functional team.

Competitive Programming & Problem Solving

LeetCode — Solved 100+ problems with focus on arrays, Strings, Linked Lists, Stack, Queues, Trees, Graphs, and dynamic programming
